

# **Lenzyme** Bio Filter Wash

*The first ever bio filter wash for the septic industry is designed for contractors to offer another high quality service to their customers. Lenzyme Bio Filter Wash has 3 functions to help the contractor complete the filter washing process. Lenzyme Bio Filter Wash provides septic contractors with a safe, easy, quick, and environmentally friendly method to clean all types of septic filters. It fits perfectly with your septic services. The Lenzyme Bio Filter Wash is part of Lenzyme's complete septic system treatment program which includes pumping the tank, inspecting the system, bio washing the filter, treating the drainfield for bio-mat buildup and providing the customer with their monthly pre-measured Lenzyme treatments.*

## **3 Specific Functions:**

- ① Contains cleaning agents to help loosen the organic materials which accumulate on the septic tank filter. Makes your cleaning job much easier and quicker. Plus it is environmentally safe for the septic system.
- ② Applies an effective Bio film to coat the filter. This helps reduce the future buildup of solids on the filter and helps to avoid filter plugging.
- ③ Inoculation of Bacteria & Enzymes to recharge the septic tank and drainfield, using our High Quality Lenzyme microorganisms.
