

Trap-Cleer Floor Cleaner

CLEAN TILE
FLOORS &
GROUT LINES

Treatment Procedures:

- 1 Use the Trap-Cleer floor cleaner at least once per week for your entire floor cleaning. If you are just starting out using our floor cleaner you might want to do it more often until your grout lines are cleaned. A little bit goes a long way because it comes as a super concentrate in quarts or gallons. Follow the instruction on the bottle for recommended use in your size restaurant.
- 2 Use our Trap-Cleer grease trap concentrate for any size grease trap. Comes in powder or liquid and can be applied by your employees. Or to insure consistent treatment use our auto injector system with our liquid concentrate.
- 3 Don't be fooled by other products packaging size or costs. What matters is the daily treatment cost to your operations. You should always break your grease treatments down to a daily treatment cost when comparing grease treatment products.

Recommended Practice:

It is a good idea to use Trap-Cleer floor cleaner at least once per week. Let your eyes tell you how often to use it based on your operations. Our auto injector pump system is the best way to control grease in your grease trap. Also remember to have your grease trap cleaned on a regular schedule. Prevention is the best policy when dealing with grease in your Restaurant!
