

# Offer a Complete Septic System Service

## Recommended Practice:

*It is a good idea to offer a complete septic system service to your customers. Lenzyme treatment products along with your equipment and service make for a great combination to help protect your customer's septic system. This complete septic system service will help your customers avoid messy and costly repairs or replacement. They want a healthy and properly working septic system, so it will last a long time. Do your business and your customer a favor by offering our high quality products along with your quality service!*

## Complete Septic System Treatment Process:

- 1) Clean (pump) and inspect the septic tank - use Lenzyme tank activator (gives the septic tank a boost of high quality enzymes & bacteria after the pumping is complete)
- 2) Wash and inspect the septic filter - use Lenzyme Bio Filter Wash (Does a better job of cleaning the filter and reduces your time in the cleaning process + Bio-coats the filter with enzymes & bacteria)
- 3) Inspect the distribution box and the drainfield - use Lenzyme Drainfield Biological Activator & Arcan Oxidizer (excellent for bio-mat balancing of the drainfield microorganisms)
- 4) Customer to do a monthly maintenance treatment - use Lenzyme pre-measured packets - Lemon fragrance, clean easy to open packets (helps to reduce organics in the house drainlines, and helps to maintain the proper balance of microorganisms in the septic tank system)
